I am a highly motivated NTUA ECE graduate with interests in computer science, software development, artificial intelligence, networks, cryptography, and other related fields. After completing a demanding integrated MEng degree of 300 ECTS, I am eager to extend my on-hands experience.

EXPERIENCE

Software Engineer

September 2026 – Present

Blueground

Athens, Greece

- Working with the AI Team, we build and maintain an intelligent customer support system to automate inquiry handling and suggestion tools.
- The latest addition is a chat interface enabling users to seamlessly resolve questions in real time.
- Core technologies used: Python, Flask, PostgreSQL, LangChain/LangGraph, React, Typescript, Vite, Pytest, Vitest.

Software Engineering Intern

March 2026 – August 2026

Blueground

Athens, Greece

- Completed a 3-month technical training program where we developed a geospatial visualization application to map and analyze partner listings performance using Next.js, deck.gl, Clerk, and deploying via Vercel.
- Then I transitioned to the AI Team for the final 3 months of the internship, contributing to core automated support features.

EDUCATION

National Technical University of Athens

October 2020 – October 2026

School of Electrical and Computer Engineering

Athens, Greece

- Fields of concentration: Computer Science, Telecommunication Systems, Computer Networks

KU Leuven

September 2024 – February 2025

Erasmus Exchange Programme

Leuven, Belgium

- Modules: Distributed Systems, Cryptography, Network Security, Machine Learning, Operational Management

PROJECTS

Diploma thesis | Python, LangGraph, LangChain, Streamlit, Pytest

- Developed an Agentic system for translating human intents into optimization parameters applied to multi-criteria optimization problems in intelligent networks. Evaluated the framework using a Service Placement Problem simulator in the Cloud-Fog-Edge continuum.

Other projects

- Three-tier web application for a School Library using HTML/CSS, Python/Flask, and MariaDB.
- Native mobile app using Figma, Flutter, Dart, and Firebase exploring UI/UX designs and incorporating gamification and crowdsourcing features.
- Document Management System using Java/JavaFX featuring role-based access control.
- Bluetooth Cryptography Analysis: Evaluated the Bluetooth ECDH pairing protocol, identifying missing validation checks that enable the Fixed Coordinate Invalid Curve Attack.
- Advanced Computer Architecture Projects using benchmarks to evaluate and compare system performance under various configurations.

TECHNICAL SKILLS & LANGUAGES

Languages (Coding): Python, Java, C/C++, JavaScript/Typescript, SQL, HTML/CSS

Frameworks & APIs: React, Node.js, Next.js, Flask, Flutter, Spring, REST, gRPC, OpenAPI, JavaFX

Tools & Environments: Linux, Git, Docker, Snowflake, Firebase, Postman, Datadog, WSL, Figma

Libraries: Pandas, NumPy, Matplotlib, Scikit-Learn, NetworkX, TensorFlow

Spoken Languages: English (ECPE - Full Proficient), French (DALF C2), Greek (Native)

INTERESTS & ACTIVITIES

Volunteering: EESTEC IT Board, Open Conf 2023, TEDxNTUA 2023, ECESCON 12, EESTEC Soft-Skills Workshops, Girls In Tech GR coaching sessions, Buddy Program ESN NTUA.

Hobbies: Travelling, Greek, English and French literature, Tennis, Pilates
